KODIAK PVC PANELS
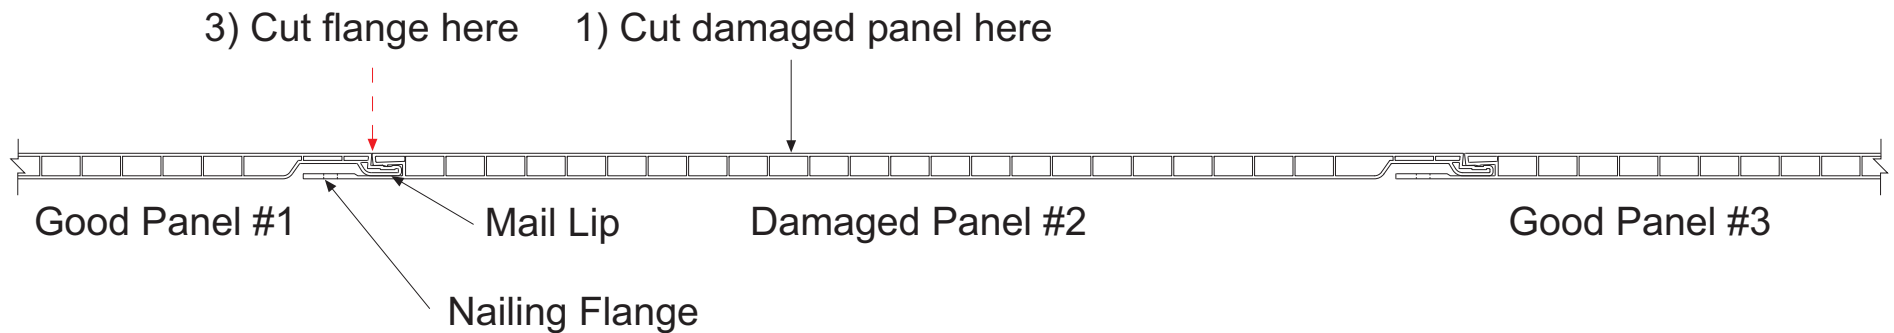

REPLACING DAMAGED PVC PANEL

1) Cut damaged panel #2 vertically through length of panel

2) Remove damaged panel #2 from good panel #3

3) Cut remaining damaged panel and nailing flange where shown, along with the male lip of good panel #1

4) Cut nailing flange from new panel.

5) Insert new panel into panel #3

6) Silicone new panel (without nailing flange) to panel #1
