

## VEROLITE™ Extended Warranty

### Warranty:

This warranty is for an additional 5 (five) years to the already established 10-year limited written warranty for light transmission and yellowness only. Consistent with the Domtek warranty, the product must be installed and maintained according to Domtek's recommendations. In all cases, the surface bearing the proprietary UV protection must be the only side exposed to direct sunlight and the effects of weather. This warranty does not apply to sheet that has been thermoformed, scratched, abraded, or exposed to corrosive materials or chemicals.

This limited written extended warranty shall be Domtek's sole liability and the Customer's exclusive remedy for the products and all other claims for damages are excluded. The limited written extended warranty is in lieu of all other warranties (except of title), written or oral, statutory, express or implied, including any warranty of merchantability or fitness of purpose. This limited written extended warranty shall be governed by the laws of the United States.

This limited extended warranty has been issued on October 2015, and is restricted to material sold by Domtek after such date. This limited warranty is given only to the original purchaser of Domtek sheet and does not extend to any subsequent purchaser or transferee.

### Yellowing:

Yellowing will be determined by subjecting a cleaned sheet sample to the Yellowness Index Test ASTM D1925. Any claims for sheets displaying a change in Yellowness Index of 10 units or less compared with their original value, will not be accepted. According to the ASTM D 1925 norm, the Yellow Index in relation to the initial value will not be greater than 10 (ten) for Clear and Softlite Panels. The characteristics shall be measured on a clean sheet, without scratches and properly maintained per the Domtek Installation Guide.

### Light Transmission:

Loss of light transmission will be determined by subjecting a cleaned sheet sample to the Light Transmission Test ASTM D1003 (1977). Any claims for sheets displaying a loss of light transmission of 6% or less, compared to the original value, will not be accepted. During the warranty period, the LEXAN™ multiwall sheets will maintain an elevated degree of light transmission. According to the ASTM D 1003 norm, the loss of light transmission in relation to the initial value will not be greater than 6 (six) % for Clear and Softlite panels.

### Warranty Schedule:

If a claim under this limited extended written warranty is justified, Domtek will provide the purchaser with replacement material free of charge in accordance with the following schedule.

If replacement material cannot be provided within a reasonable period of time, Domtek may opt to refund the original purchase price paid to Domtek, or a portion thereof, in accordance with the below schedule. Domtek is not responsible for any labor or shipping costs.

Time from Orig. Purchase Date	Change in Yellowing Index (YI)	Loss in Light Transmission (LT)	Material Replacement
Up to 10 Years	$\Delta YI = 10$	6 % (Percent)	100 %
In 11th Year	$\Delta YI = 10$	6 % (Percent)	75%
In 12th Year	$\Delta YI = 10$	6 % (Percent)	60 %
In 13th Year	$\Delta YI = 10$	6 % (Percent)	45 %
In 14th Year	$\Delta YI = 10$	6 % (Percent)	30 %
In 15th Year	$\Delta YI = 10$	6 % (Percent)	15%
